INMEDIATA
Services you trust for health.

SECURE**INSIGHT**

Simple, **Accurate**, and **Meaningful**.

SecureInsight provides a business intelligence solution with a single point of access with personalized views. Integrates aggregated data from various financial and clinical sources leveraging claims, remittance, denials, and HL7 data.

By providing reports & visualizations reflecting behaviour and trends of healthcare to help drive an accelerated data driven decision-making process.

The information is accurate, reliable, and near real-time.

Reporting - An executive can make their own analysis without requiring an analyst or technical support.

Dashboards - Customers are able to provide an enterprise level analysis of the revenue cycle with actionable insights.

In-depth Analysis - Rich information can be easily displayed using graphs with drill down capabilities and detail.

Benchmarking - Trend and compare organizational performance historically to measure results against a target.

Integration - Incorporates large and complex data sets into an analysis.

Experience - Backed by the guidance of experienced healthcare professionals.

REDUCES THE COST TO IMPLEMENT

Uses an existing data source which eliminates the need to replace existing and expensive technology.

ACTIONABLE INSIGHT PROVIDED

Leverage the information needed to make a decision before little problems become big ones.

SOPHISTICATED ANALYTICS

Use trends to see problems buried in layers of data.

KEY PERFORMANCE INDICATORS

Display near real-time metrics timely.

Our business intelligence and dashboard solution can change how you see your business. Compare your results to your objectives to highlight problems while they're still manageable. Bring transparency to the decision making process by providing interactive dashboards with actionable data.
