

SECURE TRACK ATTACHMENTS

Optimize your financial performance with **Electronic Attachments**.

Inmediata's SecureTrack Attachments ad-on feature is an electronic solution for providers and payers who want to improve revenue cycle efficiency using a digital process to submit chart notes and the results from diagnostic testing.

Our solution electronically delivers the additional information as attachments to payers through an online portal that indexes the documents for both parties.

DRIVE EFFICIENCY

Including attachments in claims reduce rejection rates and re-submit efforts. According to the AMA, the expense of inefficient healthcare claims processing, payment, and reconciliation comprises 10-14% of practice revenue. The benefit of having an electronic attachment solution to efficiently submit claims, is that changes can be made instantly, prior to submission, so claims can get paid faster, rather than waiting weeks for a denial and having to re-submit them for payments.

MAXIMIZE VALUE

Increase volume of electronic transactions since there is no need to send a paper claim with a paper attachment. You can now reduce the administrative burden and cost associated with existing paper workflows. With attachments you can improve accuracy and save time by ensuring payer-specific documentation and information is attached.

- Allows digital attachments to be connected to a specific EDI transaction, enabling users to associate and review the claim and supporting documents required for payment.
- Electronically delivers attachments to the payer through the clearinghouse application.
- Eliminate denials where the payer requests additional documentation to pay the claim.
- Payer requirements can be preconfigured within the clearinghouse application.
- Reduce the administrative burden and cost associated with mail and paper.
- Save time by ensuring payer-specific documentation is provided digitally.
- Easily track and manage claims and their associated attachments.
